

Jim2.Cloud Jim2® Business Engine

Fact Sheet

Jim2.Cloud takes the powerful features of Jim2 Business Engine and uses the latest in Microsoft RemoteApp technologies found in Server 2016 to deliver the full Jim2 Client to a list of PC, Mac, iOS, and other tablet devices.

Happen Business Managing Director Paul Berger explains, "Our aim with Jim2.Cloud was to provide our clients with an identical experience to the existing Jim2 client, but delivered and accessed via the cloud. Developed over the last two years, we have created and tuned an impressive back-end infrastructure and cloud environment, and are happy to say Jim2.Cloud is now in daily use by hundreds of happy new and existing clients".

Cloud solutions are increasingly becoming the go-to product for medium sized businesses to work smarter, and revisit their approach to business software and IT infrastructure. Happen Business is excited to take the technologies from its flagship product Jim2 to new heights, with greater flexibility and heightened security.

Continuing to improve visibility by tracking, tracing and analysing business operations with the comprehensive business management package, Jim2.Cloud enables businesses to bend and flex their software to grow with their business and its future development, adding new users and branching into new locations with ease.

What's Included?

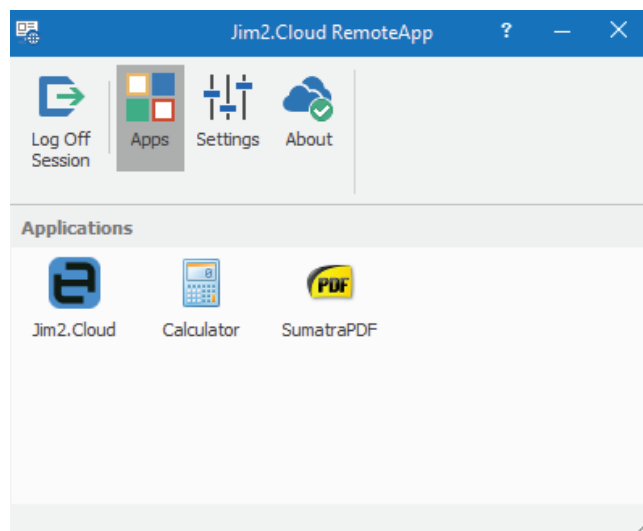

Jim2.Cloud opens the door to business owners across a range of industries to leap from traditional licensed 'on premises' ERP software packages to a new monthly bundled subscription that combines the following in an all-in-one solution:

- Software licensing of Jim2 Client and Jim2 Mobile iOS app
- Microsoft SQL licensing
- Access via Jim2.Cloud RemoteApp using the latest Microsoft RemoteApp technologies found in Server 2016
- Data storage for documents and emails
- Live database and a training database
- Ongoing management of software upgrades and licence keys
- Performance monitoring and maintenance
- Plus, daily geo-replicated backups of your data

Jim2.Cloud Benefits

- Outstanding cloud experience delivered via the Jim2.Cloud RemoteApp, the no-setup application developed by Happen Business that provides a quick and simple login for your staff. Remote App available on a list of PC, Mac, iOS, and other tablet devices.
- Best valued Jim2 licensing bundle that includes Jim2 Client and Jim2 Mobile access per user to connect teams.
- Access to Jim2 on demand using the latest in Microsoft RemoteApp technologies found in Server 2016 to deliver an outstanding experience that's on par with its alternative, Jim2 on premises platform.
- Added flexibility to expand with growing businesses without traditional IT infrastructure costs – easily add new staff and new branches with high speed internet access.
- Highest levels of redundancy and failover, with cloud customers' data securely housed within Microsoft Azure Datacentres.
- Peace of mind as data is proactively managed with daily geo-replicated backups.

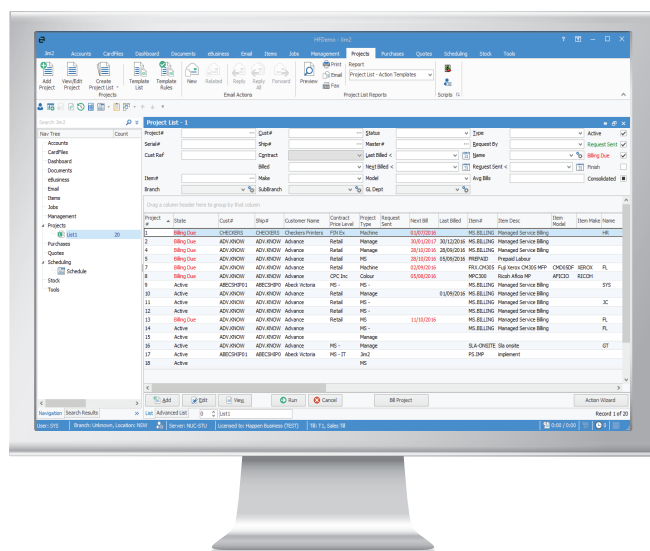

- Exciting new licensing model that combines core features with popular optional extras, like retail functionality and eBusiness in a new monthly subscription package.
- Option to switch platforms from cloud to on premises, and vice versa, should your infrastructure setups change in the future.

Jim2 Mobile

Jim2 Mobile App, standard with Jim2.Cloud, continues to empower field staff with on-the-go access to the Jim2 database, with a nice swipe and tap feel that's ideal for touch screens carried by sales and service staff. The Jim2 Mobile app continues to be available on the latest iOS devices.

While Jim2.Cloud is certainly the latest and greatest in Happen Business' suite of business software products, we continue to offer the traditional on premises platform to current and future customers with future development continuing to be available for both platforms.

Cloud Editions

Jim2.Cloud is available in five editions: Standard Edition, Premium Edition, Enterprise Edition, Managed Services Edition, Managed Print Services Edition.
