- Jim2[®] is Australian designed, developed and supported – the people who make the software are the same people who support the software
- Jim2[®] manages your entire operation in one business system
- Free lifetime email support
- Simple implementation process

Who is Happen Business?

Before Jim2[®] Business Engine, Accounting software merely produced financial results. Happen Business developed Jim2[®] Business Engine as a tool that starts with establishing business processes, manages workflow and resources, and completes the process with financial results and profit reporting.

Happen Business is an Australian owned and operated business established in 2001 to fill a growing need in the market for a comprehensive accounting and business workflow software solution.

Happen Business was formed to develop, sell and implement the process driven ERFP (Enterprise Resource Planning) and Accounting system known as Jim2[®] Business Engine.

The company has rapidly established a strong following for its Jim2[®] Business Engine software and now has an extensive customer base in diverse industries such as importing, distribution, computer and office equipment sales and service, specialised retailing and manufacturing.

Happen Business has customers in every state and territory of Australia, with Jim2[®] users from Melbourne to Mt Isa, Port Macquaire to Perth, and everywhere in between.

What is Jim2[®]?

Jim2[®] Business Engine is a powerful multi-user ERP (Enterprise Resource Planning) and Accounting solution, built for businesses that retail, manufacture, distribute, import, service, or any combination of these.

Jim2[®] manages every aspect of your business workflow cycle – from stock control, sales, servicing and customer contact to quoting, invoicing, financials and reporting.

Rather than just focusing on accounts and numbers, Jim2[®] is a tool for your business to better manage and control business operations.

As a business owner/manager, this means less time micro-managing, as the tasks being performed and completed by staff are visible from the software.

"We have found Happen's service exemplary, with their ongoing support being immediate and cost effective. Our return on investment in Jim2[®] was almost immediate simply by have a system that could link Purchases to Jobs that ensured all costs (labour and materials) were trapped and invoiced correctly, on time and accurately."
